

The MCMA PRESENTS SHOWDOWN 2010

March 13, 2010

The membership of The Metroplex Car Modelers' Association is proud to present their annual model car contest and swap meet.

Showdown 2010 is being held on Saturday, March 13, in Irving Texas at the Senter Park East Community building. Senter Park East is located at 228 Chamberlain Street, Irving, TX. 75060. See the Events Page on our web site at www.themcma.com for directions.

Showdown 2010 is open to any modeler wishing to compete. No preassembled (factory) kits will be allowed in the contest. Prepainted kits will be allowed only in the Junior or Teen Classes. The entry must be the sole work of the entrant. A second party may enter models on behalf of a builder. Any model that has won a first place in any previous Showdown is not eligible for competition. If the builder would like to display his/her model(s) (with award if possible), a display table is available and the model can be displayed at no charge to the builder.

Registration fee is \$15 for the first 2 models, \$2 for each additional model with a max cap of \$25. No fee will be charged for builders / contestants age 12 and younger. Any question of category placement should be addressed at the time of registration with the contest staff. The Showdown committee

and judging staff reserves the right to place entries into different categories should classification conflicts warrant.

Any level of detail or modifications will be allowed unless noted in the category description. A minimum of four entries will be required to keep a class open. Bases are allowed, but cannot exceed 1" beyond the model in any direction.

We ask that all models be left on the tables until the award presentation has been completed.

DURING JUDGING MODELS MAY REQUIRE HANDLING FOR PROPER AND COMPLETE EVALUATION!!!!!!!!!!!!!!

JUDGING STAFF

The judging staff, if possible, will be a cross-section of modelers from different clubs in attendance. Judging teams will consist of three modelers that are knowledgeable and familiar with different aspects of modeling. Entries will be judged on the quality of craftsmanship, degree and difficulty of modifications and overall appearance of the finished product. Winners will be determined by general consensus of the judges. Judging of master awards will be done by a team comprised of one member from each judging team. The judge chairman or contest coordinator will resolve disputes. Any class could be split by the discretion of the contest committee. There will be a **NO SWEEPS** rule for all classes.
